

Specialized Drive-In Screen

Say hello to the new and easy way to do Drive-Ins

Regular Screen

Flatbed Average Rental - \$500
Additional Labour - \$500

Custom Drive-in Screen

Save around \$1,000 dollars

Why are these new screens awesome?

Save Money

Cha-Ching. No more paying money for extra crews, set-up times, and renting of huge flat deck trailers. This leaves you with more money to spend on other fun things to spice up your event.

Stress Free

Yoga Classes are great, but not necessary anymore. The logistical nightmare of trying to find & rent trailers and then line up dates & times for drop-off and positioning is completely gone. Namaste my friend.

Save Time

We may not have a time traveling Delorean, but we do have ways of saving time. These screens are set up the same way as normal events. The process is simple and fast. No more going to the site early to spot trailers and lift the screen onto a 5 foot trailer.

Increased Safety

The inherent dangers of setting up screens on top of trailers are eliminated. Now the screens sit on the ground. The safest place possible!

Why do a Drive-In?

Nostalgia

Grease Lightning anyone? Drive-ins are one of the truly lost forms of entertainment for the 21st century. Nothing brings a more fun, romantic, and fuzzy family feel than the nostalgia of a drive-in movie.

Concrete Friendly

Drive-ins allow the opportunity to have a FreshAir movie event without the need of a park or green space. If you have a parking lot, a street, a drive-way or a top secret Area 51 runway... you can have a drive-in.

Weather

Drive-in events are not affected by weather as much as OpenAir events so the chance of having a successful event is very high.

But Why FreshAirCinema?

We are the first & only company in Canada to pioneer the unique Drive-In Screen. Our goal is to make your life easier so you can spend more time having fun & enjoying your event. Our innovative Drive-In screens allow you to bring back the 'Classic' Drive-In Cinema to your community.
